

Weighing the Work of Connectivity

Many customers underestimate what it takes to design, deploy, and manage a reliable connectivity solution. At OptConnect, we do the heavy lifting for you by leveraging our domain expertise, proprietary technology, and precision workflows so you get what you need at the lowest total cost.

The Connectivity Cycle: 20 Elements to Consider

Just because you have a router and data plan doesn't mean you're ready to roll. At OptConnect, we lead you through 20 elements of your connectivity deployment, pinpointing key determinants of success over your solution's lifespan.

Functional Requirements	Budgetary Requirements	Routers & Modules	SIMs / eSIMs
Carriers	Critical Accessories	Network Design & Security	Inventory Management
Asset Protection	Supply Chain	Profile Management	Pre-Deployment Testing
Configuration & Activation	Kitting & Shipping	Field-Tech Training & Support	Connectivity Troubleshooting
Software & Firmware Updates	Data Plan & Usage Monitoring	Vendor Manage, Billing & Payment	Ongoing Deploy Optimization

Critical Partnerships That Make It Happen

For successful connectivity, who you know is every bit as important as what you know. OptConnect has deep, tier-one relationships with everyone that matters in cellular IoT. With our priority access, rapid escalation, and white-glove service, you enjoy a level of support you can't get anywhere else.

Premier Network Carriers	Leading Hardware OEMs	SIM / eSIM Providers	System Integrators
Critical Accessory Vendors	Software & Security Partners	Global Logistics Providers	Field Service Organizations

Expertise To Bring It All Together

It requires a lot to design, deploy, and manage robust IoT connectivity solutions — and OptConnect has the skillsets to prove it. It's how we offer the best customer experience in our industry.
